

Air Compressor Filter Elements

Fast, Cost Effective Solutions

We're Ready to Help You Avoid Costly Downtime
3-D Service specializes in solving your equipment problems - on time, to specifications and within budget.

Air Compressor Filters

Need Other Equipment or Services? We can handle all of your rotating equipment and power system needs. For quality service at your site or in our shop call **800.837.1614** for 3-D Service.

Oil Filters

- Resin-impregnated cellulose or microglass filters
- Aid in removal of contaminants
- Hold large capacity of dirt
- Provide optimal performance and extend life of compressor

Air Filters

- 3-D Service carries full line of quality air filters to fit most major brands
- Prevents harmful particles and contaminants from entering compressor
- Helps prevent premature lubricant change-outs, bearing problems, and air end failures

Separators

- Designed for use in rotary vane and rotary screw compressors to remove oil particles from discharge air before continuing downstream
- Made of highest quality materials
- Available in a variety of types to fit most makes and models
