

Engineering Services Group

An experienced, integrated and complete Power Systems Team

Magnetech is a single source provider to the commercial, industrial and utility markets. We design and integrate complete power generation systems including software, controls, transfer switches, generator sets, enclosures, switchgear, and fuel tanks. We provide technical training along with parts and service.

Switchgear & Breaker Restoration Services

- Water Damage
- Failures
- Modernizations
- Vacuum Replacements
- Solid State Conversions

Consulting Services

- Specification Development
- Coordination Studies
- Load Flow Studies
- Short Circuit Studies
- Arc Flash Studies (PPE)
- High Value Asset Protection and Risk Studies
- Acceptance Testing
- Harmonic Analysis
- Power Factor Studies
- Ground Grid Studies

Transformer Condition Monitoring

- Screens and Dissolved Gas Analysis

Asset Management and Tracking

- Spare Breaker Development Programs
- Parts and Inventory Development and Consolidation

Predictive Studies and Services

- Infrared Thermography
- Ultra Sonic Corona Detection

Training and Seminars

- Awareness Seminars and Industry Updates
- Fuse Selection and Application Seminars
- New Technologies
- Relays and Protection

Transformer Remediation and Replacements
Spare Breaker and Used Breaker Matching Services
Match and Line Up Switchgear Additions

Our service technicians are available 24/7/365 at each of our Service Centers
